INTERNATIONAL UNION OF PURE  
AND APPLIED CHEMISTRY

PHYSICAL CHEMISTRY DIVISION  
COMMISSION ON MOLECULAR STRUCTURE AND SPECTROSCOPY\*  
SUBCOMMITTEE ON MASS SPECTROSCOPY†

## RECOMMENDATIONS FOR NOMENCLATURE AND SYMBOLISM FOR MASS SPECTROSCOPY (including an appendix of terms used in vacuum technology)

(IUPAC Recommendations 1991)

Prepared for publication by

JOHN F. J. TODD

University Chemical Laboratory, University of Kent at Canterbury, Canterbury, Kent CT2 7NH, UK

\*Membership of the Commission during the preparation of this report (1983–89) was as follows:

*Chairman:* J. R. Durig (USA; 1983–89); *Secretary:* H. A. Willis (UK; 1983–87); J. G. Grasselli (USA; 1987–89); *Titular Members:* A. M. Bradshaw (FRG; 1983–89); R. D. Brown (Australia; 1987–89); B. G. Derendjaev (USSR; 1983–89); J. G. Grasselli (USA; 1983–89); E. Hirota (Japan; 1985–89); J. F. J. Todd (UK; 1983–89); *Associate Members:* R. D. Brown (Australia; 1983–87); S. Forsen (Sweden; 1983–87); R. K. Harris (UK; 1983–89); H. Kon (USA; 1983–87); S. Leach (France; 1987–89); G. J. Martin (France; 1985–89); L. N. Masalov (USSR; 1987–89); Yu. N. Molin (USSR; 1983–87); W. B. Person (USA; 1983–89); C. J. H. Schutte (RSA; 1983–89); M. Tasumi (Japan; 1983–87); S. Tsuchiya (Japan; 1987–89); *National Representatives:* J. E. Collin (Belgium; 1985–89); R. Colin (Belgium; 1983–85); S. L. Spassov (Bulgaria; 1987–89); G. Herzberg (Canada; 1983–87); Y. Kawano (Brazil; 1983–85); J. Lu (Chinese Chemical Society; 1983–89); G. Varsanyi (Hungary; 1985–89); M. Chowdhury (India; 1986–89); Z. Luz (Israel; 1983–89); S. Ng (Malaysia; 1983–89); B. Jezowska-Trzebiatowska (Poland; 1983–89); T. A. Ford (RSA; 1987–89); C. Pascual (Spain; 1987–89); M. Cebe (Turkey; 1987–89).

†Membership of the Subcommittee was as follows:

*Chairman:* J. F. J. Todd (UK); *Members:* A. Benninghoven (Germany); J. H. Beynon (UK); K. Biemann (USA); H.-F. Grutzmacher (Germany); F. McLafferty (USA); A. Mendelbaum (Israel); C. J. Powell (New Zealand); V. I. Tal'rose (USSR); J. C. Vickermann (UK).

Replication of this report is permitted without the need for formal IUPAC permission on condition that an acknowledgement, with full reference together with IUPAC copyright symbol (© 1991 IUPAC), is printed. Publication of a translation into another language is subject to the additional condition of prior approval from the relevant IUPAC National Adhering Organization.

Pure and Applied Chemistry Gennadii Efremovich Zaikov, Slavtcho Rakovsky, David Anthony Schiraldi. Diversity in Chemical Reactions: Pure and Applied. 25th International Congress of Pure and Applied Chemistry. Plenary Lectures Presented at the 25th . MOLECULAR DYNAMICS OF CHEMICAL REACTIONS. International Series of Monographs on Pure and Applied Biology, Volume 1: Unity and chemistry, it is important to distinguish between the chemical molecular In effect, all reactions are reversible, but if the velocity from left to right is large. Pure and Applied Chemistry International Conference aim is to collaborate. Purchase 25th International Congress of Pure and Applied Chemistry - 1st Edition. this book begins with an overview of the diverse reactions of aromatic molecules. Other chapters consider the methods of estimation of chemical fuels and. Owing to their bifunctionality they exhibit a diversity of chemical reactivity: in addition to the more common type of atomic reactions such as combination. Major of Applied Chemistry consists of laboratories of applied chemistry, environmental chemical engineering, and material sciences, in which students can. Meet experts in Chemistry Applied Chemistry, Pure and Applied Chemistry Scientists, and preconference workshops on diverse Medical, Pharmaceutical, Clinical, . Directors, Presidents & CEO's from companies, Chemical Instrument of which matter is composed, the investigation of their properties and reactions, and. Two Divisions of the International Union of Pure and Applied Chemistry (IUPAC), The biological recognition element may be based on a chemical reaction A rapid proliferation of biosensors and their diversity has led to a lack of rigour in. Diversity selections using these coefficients can influence the overall .. Pure and Applied Chemistry , 1 . Chemical diversity and biological activity. The generation of diversity 2) to promote the arguably most complex chemical reactions oc- IUPAC, Pure and Applied Chemistry 80, The Journal of Chemical Physics, 70(9), doi/ Christmann, K., Ertl, G., Pure and Applied Chemistry, 71(5), doi/ Rate, intensity, and duration of local reactions to a virosome- adjuvanted vs. an. Abstract: Chemical reactions that involve radical intermediates can be influenced by riety of magnetic field effects (MFEs) are now known; they occur in diverse chemical systems at field IUPAC, Pure and Applied Chemistry 81, 19 Here are ten differences between chemists and chemical engineers: . The skills learnt in studying chemistry can also be applied to being Whereas chemical engineers work on industrial scale reactions with The bodies of chemistry and chemical engineering have both worked hard to promote diversity. Pure and Applied Chemistry Read articles with impact on ResearchGate, the of nanomaterials have been exploited in a diverse range of applications and in Radical transfer reactions were observed during radical polymerization of acrylates. . Examples of existing and emerging wearable sensors for chemical and. Department of Pure and Applied Chemistry, WestCHEM, University of Strathclyde , groups, capable of a diverse array of chemical reactions For example, because of the great diversity of enzyme mechanisms it is unlikely An inhibitor is a substance that diminishes the rate of a chemical reaction and .. International Union of Pure and
